AI Engineer & Developer Advocate | AI Infra | 250k+ community |
“@LindaVivah” on social channels | Former AWS, Ray OSS
New York, New York, United States

Summary

I'm an AI Engineer and Developer Advocate building technical education content at the intersection of AI engineering and AI infrastructure: distributed compute, cloud architecture, AI agent workflows, and developer tooling. Technical content, made to stick. I've partnered with companies like Anthropic, NVIDIA, Microsoft,

Staff Developer Advocate at Anyscale, focused on Ray, the open-source distributed computing framework. Before diving into the startup world, I spent 10+ years in corporate tech. That included 3+ years as a Cloud/AI Developer Advocate at Amazon Web Services (AWS), building educational content across Cloud, AI, and DevOps, plus the AWS Community Builders program years before joining. My earlier career spans Software Engineering, SRE, DevOps, and Cloud Engineering. My journey into tech wasn't linear. I majored in Philosophy, started my career in media, and pivoted into engineering through Flatiron School in 2015. That mix of humanities, media, and engineering is the foundation for how I break things down: bridging technical depth with creative clarity so developers can learn faster, build smarter, and feel seen at every level. On the consulting and advising side, I work with tech companies and technical founders on DevRel strategy, creative tech storytelling, and developer upskilling in AI engineering and AI infra. The goal? To help engineers and builders navigate the firehose, build confidently, stay ahead of what's next, and feel a little less alone and a lot more joyful along the way. Here's to forever learning & building what's next - together!

Experience

LindaV Media Labs
Founder
January 2018 - Present (8 years 6 months)
New York, United States

onths)

3 years 2 months

5 (8 months)

(3 years 2 months)

New York, United States

Fox Corporation

6 years 9 months

Site Reliability Engineer (SRE) / Infrastructure Engineer

November 2020 - June 2022 (1 year 8 months)

Software Developer

May 2016 - November 2020 (4 years 7 months)

New York, New York

Create, update, and edit web applications

Notable Projects:

- Elections 2020
- FoxBusiness.com Redesign
- Fox Alexa App
- Midterm Elections Prediction page 2018: Interactive map, tables, probability meters, & video components displaying live prediction data for the 2018 midterm elections
