Resumo

PhD in Electrical Engineering from the University of Brasília (2009), with a postdoctoral fellowship at Lancaster University, UK (2021), focused on IoT macroprogramming. Since 2010, he has been an Associate Professor at the Institute of Informatics, Federal University of Goiás, teaching both undergraduate and graduate programs. His research interests include Distributed Systems and Computer Networks, with emphasis on middleware, cloud computing, and ubiquitous computing. He currently coordinates and participates in research, development, and innovation projects at the Center of Excellence in Artificial Intelligence (CEIA/UFG), applying AI techniques for sensor data collection and task automation, ranging from essential operations to highly complex processes.
