Resumo

"I am a Ph.D. student specializing in the field of artificial intelligence applied to nanomaterials, quantum computing, and semiconductors. My background is in Aeronautical Engineering, and I possess a strong foundation in data science and investment expertise. Driven by a passion for harnessing data-driven insights to foster business growth, I excel in bridging the gap between technical proficiency and strategic decision-making. My diverse skill set enables me to analyze complex data sets, develop innovative solutions, and identify investment opportunities within the aerospace industry. I thrive in multidisciplinary environments and enjoy collaborating with cross-functional teams to deliver impactful results. Let's connect and explore how we can drive innovation and success together!"

Data Scientist

I am actively involved in an innovative project focused on developing quantum chips using diamonds, with a specific emphasis on characterizing the NV-defect using artificial intelligence (AI). I contribute to developing advanced algorithms to optimize chip design and manufacturing, exploring applications in quantum computing and high-precision sensors. This interdisciplinary effort aims to integrate cutting-edge technologies to drive the next generation of quantum devices

HEKIM Capital Partners

Head of Aerospace Consulting

2023 - dezembro de 2025 (2 anos)

Zurique, Suíça

As a Head at Hekim Partners, a Swiss investment bank with an extensive network, working the European financial advisory vertical, I am at the forefront of driving strategic planning and fostering cross-industry collaboration between European aerospace/aeronautical companies and their Brazilian counterparts. My role involves facilitating alliances between aerospace startups and Brazilian companies, as well as prospecting business opportunities with Worldwide investment groups. Leveraging my engineering background, I provide technical expertise and insights to support the decision-making process within the group, offering valuable guidance and pathways for growth

Mayday - Start up

Chief Data Scientist

julho de 2020 - dezembro de 2025 (5 anos 6 meses)

Responsible for providing overall leadership and strategic direction to the company. Their role involves setting the company's vision, mission, and goals,

as well as making critical decisions to drive growth and ensure the success of the business. AI developer and ESC.

Abrão Filho Banking & Câmbio
Foreign exchange business consulting

Alphaville

The first company to operate in foreign exchange correspondence exclusively with banking financial institutions. The actions consisted and consist of:

- Creation of banking products, with a foreign exchange bias, in accordance with the legal structure of the bank;
- Modulation and flexibilization of the Customer and Operational Processes;
- Handling of data and pre-qualification of customers with foreign exchange demands, in relation to partner banks;
- Commercial intelligence to adapt and update the commercial appetites and risk aversions of banks in emerging markets;
- Development of banking and foreign exchange technology, and reconciliation of this with multi-banking.

PJ Model.

Machine Learning Intelligence Data Scientist

Vancouver, Colúmbia Britânica, Canadá

Machine Learning Intelligence is a financial technology startup offering computational finance engineering as applied to buy side retail and institutional segments. Quantitative strategies, risk models, research tools with advanced functionalities, that allow traders and investors to participate and invest across all markets and make better decisions in following changes across asset classes, market shock and risk

Management of the investment portfolio for the aerospace sector
Conducting M&A processes
Data scientist to support investment decisions

As a seasoned professional in the aerospace industry, I have successfully served as a Portfolio Manager and Investment Strategist, specializing in the

aerospace sector. My role involves developing and implementing investment strategies for aerospace companies, fostering partnerships, agreements, and memoranda with global funds. Leveraging my expertise in data science, I employ advanced analytics to drive investment analysis and support due diligence processes. Additionally, as the Director of Strategic Alliances in the aerospace sector, I lead efforts in cultivating and managing key partnerships for mutual growth and success

PIT – Parque de Inovação Tecnológica São José dos Campos Innovation and Business Analyst

janeiro de 2022 - novembro de 2022 (11 meses)

São José dos Campos

Technological Innovation Park: Responsible for identifying emerging trends, technologies, and market opportunities that can lead to new products, services, or business models .

Management of all strategic projects within technology development centers, assisting in fundraising and global partnerships, and actively involved in the construction and implementation of the mobility cluster.

Analyze an organization's business processes, systems, and operations in order to identify areas for improvement and make recommendations for change.

STARTUPS

Saipher ATC

Aerospace Engineer and Data Scientist

novembro de 2021 - abril de 2022 (6 meses)

São José dos Campos

As a Data Scientist, I had the opportunity to work on the development and implementation of the TATIC TWR and TATIC AFIS systems and Saipher Space systems, which are integral parts of the TATIC SUITE solution widely used in the major control towers across Brazil. These systems are designed to be flexible and adaptable, catering to the unique operational and updating needs of each aerodrome and control tower. Whether it's managing low traffic volumes, handling high-volume operations at international airports, or supporting military airfields and specific missions, these systems have proven their versatility and effectiveness. I am proud to have contributed to the advancement of air traffic control technology and its impact on aviation safety and efficiency.

Also was Business Analyst .

- novembro de 2021 (9 meses)

São José dos Campos

The limits of detectivity and sensitivity of substrates developed in a carbon structure with special protection were trained in depth in order to maximize sensitivity. different types of materials will be trained. A high sensitivity and high spatial resolution Raman spectroscopy system will be used. Artificial intelligence was a relevant tool

CVDVale

maio de 2021 (11 meses)

São Paulo, Brasil

Aeroclube de São José dos Campos

Junior Project Manager

março de 2017 - fevereiro de 2018 (1 ano)

São Paulo e Região, Brasil

As the Manager of Aerodesign Team, I had the privilege of leading the aeromodelling team and spearheading various technology implementation initiatives. I was responsible for managing data, overseeing projects, and leading a talented team towards success. Under my guidance, our team achieved remarkable results, including winning the SAE 2018 prize. It was a rewarding experience to combine my passion for aviation with my skills in project management and team leadership, driving innovation and achieving outstanding outcomes

Data science *

MCTI

Scientific Olympiad in Computer Programming

julho de 2014 - julho de 2014 (1 mês)

Fortaleza, Ceará, Brasil

Participated in competitive programming olympiads, solving algorithmic and computational problems under time constraints, with focus on data structures, optimization, and logical reasoning.

Formação acadêmica

Embry-Riddle Aeronautical University

Partially fulfilled

Instituto Tecnológico de Aeronáutica - ITA

Unifesp - Universidade Federal de São Paulo

Doctor of Philosophy - PhD, Artificial Intelligence Applied to Space
Materials · (outubro de 2023 - outubro de 2026)

Instituto Nacional de Pesquisas Espaciais

Doctor of Philosophy - PhD, Artificial Intelligence Applied to Space
Materials · (outubro de 2023 - outubro de 2026)

Etep - Centro Universitário

Bachelor of Aeronautical Engineering
