Resumo

Nos últimos anos, tenho me destacado como um dos maiores especialistas e precursores em Inteligência Artificial no Brasil. Minha expertise abrange a construção de equipes ágeis através do desenvolvimento de produtos e serviços inovadores, bem como a integração e automação de processos.

Ao longo da minha carreira, fui responsável pela formação de dezenas de equipes tecnológicas, para startups e projetos de inovação em grandes empresas.

Fundei a startup Witseed com foco em inteligência artificial para aprendizagem corporativa que alcançou grande sucesso no mercado, culminando em um exit.

Além de formação em engenharia, também tenho formação em Sociologia e Cultura.

O pensamento multidisciplinar e holístico sobre negócios me orienta, permitindo criar soluções que incorporam as mais recentes tecnologias e se alinham com os objetivos estratégicos das organizações. A experiência de ter liderado uma startup do início ao exit bem-sucedido enriqueceu minha visão sobre o ecossistema de inovação e empreendedorismo tecnológico.

Reconhecido como uma autoridade em língua portuguesa no campo da Inteligência Artificial, continuo a liderar e inspirar a próxima geração de inovadores tecnológicos, combinando meu conhecimento técnico e minha paixão sobre o tema com uma visão aguçada para as necessidades do mercado e as tendências futuras.

Experiência

EXAME

São Paulo, Brasil

I spearhead the Artificial Intelligence revolution at Exame Media Corporation, collaborating closely with cross-functional teams to conceive and deploy innovative solutions that personalize experiences and amplify our impact as a media and education company.

I'm also the Course Coordinator for AI educational programs at a Faculdade Exame. This includes both short terms courses and MBA programs, reaching a diverse community of over 10,000 students.

Founder

2011 - Present (15 anos)

Lisbon, Portugal

I'm the proud founder of Inventos and we've assembled elite technology teams for more than 50 startups. I launched the company with an ambitious vision: to form premier technology teams in Brazil specifically for American startups. As the tech landscape evolved, so did Inventos. Identifying a critical gap in Brazil's burgeoning startup ecosystem, we were the pioneers in introducing "CTO as a Service," a transformative concept that filled a void by offering on-demand technical expertise and strategic leadership. This was more than just a service—it became a lifeline for countless Brazilian startups striving to bring their visions to life. Our portfolio of success stories kept growing, prompting Inventos to evolve yet again, this time into a dedicated Venture Builder. Today, our mission is broader yet as focused as ever. We're not just building teams; we're building entire companies, creating impact that goes far beyond mere numbers. I'm ecstatic about what the future holds, committed to turning dreams into tangible realities, and always open to connect with like-minded innovators.

Dooiu

Tech Advisor

West Jerusalem, Jerusalem District, Israel

As a tech advisor for Dooiu, an Israeli revenue generation and time monetization platform, my focus is on providing strategic guidance on technical matters to help the company scale globally.

OCEAN.capital

Tech Advisor

Lisbon, Portugal

As a tech advisor for Ocean Capital, a venture capital firm focused on investing in technology startups, I provide expert guidance on technical matters to help identify and evaluate potential investments. Leveraging my deep knowledge of emerging technologies and industry trends, I collaborate with investment teams to identify promising startups that align with the firm's strategic goals.

Kautak Learning LDA (SkillUp Europe)

Índia

I spearhead the company's research initiatives in Portugal with expansion plans across Europe. My core responsibilities involve generating insights on learning trends, policies, methodologies, and technologies to drive strategic decision-making and innovation in SkillUp's product and service offerings. With a solid foundation in both qualitative and quantitative research, I strive to promote evidence-based practices to uplift the educational landscape in Portugal.

Witseed

Chief Technology Officer & Co-Founder

Rio de Janeiro

Acquired by EXAME by BTG. We help professionals and companies to achieve their goals faster with our adaptive life long learning digital platform. We had a successful exit in 2023, when the company was acquired by @exame, a big Brazilian media group.

Faculdades Ibmecc

Agile Methods Professor

Rio de Janeiro, Brazil

Responsible for Agile Methods and Project Planning, Time, and Cost disciplines.

Future Law

Agile Methods for Lawyers Course Coordinator and Principal Professor

São Paulo Area, Brazil

I designed and led the Agile Methods for Lawyers course.

Rio de Janeiro, Brazil

Coordinator and creator of Agile Methods courses.

IEG - Instituto de Engenharia de Gestão
Agile Methods Course Coordinator and Principal Professor

Rio de Janeiro, Rio de Janeiro, Brazil

Developed and pioneered the Entrepreneurship module for the MBA-JR program. Led as a professor and coordinator for this module and spearheaded the Agile Management elective course.

Colégio Santo Inácio Rio de Janeiro
STEM Professor

Rio de Janeiro Area, Brazil

Mixed science, technology, engineering and mathematics to teach young students how to invent the future.

CodeComet
Founder

Rio de Janeiro Area, Brazil

Designing creative educational products to teach computer programming to younger students.

Instituto de Tecnologia e Sociedade (ITS Rio)
IT Manager

Rio de Janeiro Area, Brazil

ITS is a non-profit independent think-tank. The mission of the Institute for Technology & Society (ITS) is to ensure that Brazil responds creatively and appropriately to the opportunities provided by technology in the digital age, and that the potential benefits are broadly shared across society. Through its own research and in partnership with other institutions, ITS analyzes the legal, social, economic and cultural dimensions of technology and advocates for public policies and private practices which protect privacy, freedom of expression and access to knowledge. The Institute also offers innovative education, training and capacity development to individuals and institutions to

enable them to understand the promises and challenges of new technology. Last, not least, ITS aims to strengthen the voice of Brazil, Latin America and the Global South in international debates on technology and its regulation.

ALICE - A Life Improving Customer Experience

Greater New York City Area

ALICE is a NY startup set to transform the hotel-guest experience. Through ALICE, guests can remotely connect to a hotel's entire suite of services from any device, whether they are on or off-premise. ALICE's innovative platform enables a Hotel to have a hyper personalized connection to Guests 24/7, resulting in improved revenue, customer satisfaction, and internal operational efficiency.

Opus Investimentos Product Manager

Rio de Janeiro Area, Brazil

We developed from scratch a new business combining innovative technology and behavioral economics. I defined the operational and technological requirements for current and future products that guided a multidisciplinary team of software engineers and designers to build the product.

República Co-Founder

Rio de Janeiro Area, Brazil

I'm the cofounder of República, a site whose goal is to help Brazilians meet and interact with their politicians. More than 50K+ citizens have engaged with the site and over 10k+ politicians became members during the elections.

Americas Trading Group Product Manager

Rio de Janeiro Area, Brazil

Created from scratch an investment platform for Brazilian retail equity investors. I mapped business, regulatory, and technical issues and their interactions and synthesized the market requirements into technical features that guided a multidisciplinary team of software engineers and designers to build the product.

Rio de Janeiro Area, Brazil

- Designed and implemented processes to automate routines and manual tasks
- Developed innovative solutions to improve day-to-day financial processing
- Increased back-office team's work capacity, enabling them to manage the funds more efficiently and with less errors
- After Gavea was acquired by JP Morgan, worked in New York mapping the operational synergies between the two companies
- Designed and executed the integration plan leading a team of software engineers

Laboratório de Processamento de Sinais - UFRJ Network Analyst

While working this position, I was the Computer Network Manager of the lab and also a Software Development Solutions Researcher. I had experience with configuring high-availability servers and operating systems based on the Unix platform.
